

Freewheel Remover

A splined freewheel removal tool designed to fit Shimano freewheels to allow for their removal so that wheel bearings and axles can be accessed. It features both a 1/2" square drive for use with a ratchet or breaker bar, and a 21mm hex drive for use with a spanner.

Additional Information

- Removal tool designed to fit Shimano freewheels.
- Use with 1/2"D socketry or 21mm spanner.
- Manufactured from hardened steel.
- Part of the Kamasa Cycle Range.
