

## Brick Bolster with Non-Slip Grip & Hand Guard - 280mm

A brick bolster made from high-strength steel, with a 100mm blade that provides accurate impact and long life. The non-slip grip and hand guard protects from injury and can be conveniently removed for use in tighter spaces.

### Additional Information

- Heavy-duty brick bolster with detachable guard.
- Overall length: 280mm. Shank width: 19mm. Blade width: 100mm.
- Manufactured from drop forged & heat-treated 40 CR steel.
- Non-slip grip & hand guard can be removed by unscrewing the bottom collar on the grip & sliding the hand guard downwards.
- Concrete punch with non-slip grip & hand guard also available, please see Part No. 56161.
