

## Extendable 24ft Solar Panel/Conservatory Brush - with Twin-Face Head

Solar panels only work if they can "see" sunlight, so it is important to keep them clean to maintain efficiency. Unfortunately, they are often mounted high on roofs, making cleaning difficult. The Kamasa Extendable Water-Fed Solar Panel Roof Brush is ideal for this task. It is also perfect for cleaning hard-to-reach second or third-story windows and conservatory roofs.

### Additional Information

- 5 section telescopic pole. Extends from 1.82 to 7.32m. Aluminium lightweight pole.
- Supplied with a soft twin face brush head, size 260 x 150mm brush with central water feed. Soft Polypropylene (PP) brush bristles.
- Adjustable through 180°.
- Includes a refillable self-feeding cleaning fluid bottle. Supplied with a plastic domestic tap connector.
- 1/4" Brass shut off valve allows for complete control over the water feed.
