

Extendable 24ft Solar Panel/Conservatory Brush

Solar panels only work if they can "see" light from the sun. It is recommended that they are kept clean to maintain their efficiency. Unfortunately they tend to be mounted high on the roof. The Kamasa Extendable water fed Solar panel roof brush is ideal for this job. Also ideal for keeping roof tiles, eaves, Facia boards, gutters and soffits.

Additional Information

- 5 section telescopic pole. Extends from 1.82 to 7.32m. Aluminium lightweight pole.
- Supplied with a general-purpose brush head, size 300x70mm brush with twin water feeds. Polypropylene (PP) brush bristles.
- Adjustable through 180°.
- Includes a refillable self-feeding cleaning fluid bottle. Supplied with a plastic domestic tap connector.
- 1/4" Brass shut-off valve allows for complete control over the water feed.
